Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance:

in regard to independent claim 42, the prior art of record fails to teach or suggest a radially expandable tube consisting of extruded expanded polytetrafluoroethylene having a microstructure of nodes interconnected by fibrils and having an original inner diameter, wherein the tube is pre-dilated and is then sintered to contract the tube to the original inner diameter, the tube exhibiting a radial expansion ratio of 1.0, wherein the radial expansion ratio is defined as the radial expansion coefficient divided by the radial expansion limit, wherein the radial expansion coefficient is defined as the maximum inflation pressure of the tube divided by the percent radial dilation of the tube at the maximum inflation pressure, and wherein the radial expansion limit is defined as the burst inflation pressure of the tube divided by the percent radial dilation of the tube at the burst inflation pressure.

In regard to independent claim 50, the prior art of record fails to teach or suggest a porous polytetrafluoroethylene product comprising a pre-dilated tube that is sintered to form a contracted tube with a radial expansion ratio of about 1.0. The radial expansion ratio is defined on page 7 of the original specification at lines 15-31.
